Profile

I am a third year student of the Faculty of Microsytem Electronics at the Wrocław University of Technology. I am hard working, conscientious and I can quickly establish contact with people.

Professional Experience

04/2020 – present Wrocław	**Junior Software Engineer,** *Comarch* I am part of Frontend team working on a website for Vodafone New Zealand. I am working in Angular technology on component logic, accessing data from the ngRx store, preparing data for the wizard and preparing pre-built components for the application logic.

Education

2017 – present Wroclaw, Poland	**Bachelor of Engineering / Faculty of Microsystem Electronics and Photonic / Digital Electronics,** *University of Science and Technology in Wroclaw*

Skills

Angular	React
git	Jira
HTML	CSS
Javascript	C++

Languages

- English
- Polish

Organisations

06/2020 – 04/2021 Wroclaw	**CodersCrew,** *Frontend Developer* I was a member of CodersCrew - a non-profit organization based in Wroclaw. As part of the Frontend team I was involved in one of the biggest projects called "Mali Wspaniali". The goal was to create a web application for a foundation helping to fight child obesity. I was responsible for the implementation of views and logic of components based on mockups from Figma. The project was created in React technology.
