## 👤 Profile

---

Software engineer. I graduated from digital electronics at Wrocław University of Technology. On a daily basis I implement new functionalities to web apps. I like to face challenges and look for solutions to complicated problems.

## 👜 Professional Experience

---

04/2020 – present  
Wrocław

### **Software Engineer, Comarch**

I am part of a front-end team working on web app for Vodafone New Zealand. I work in Angular on component logic, accessing data from the ngRx store, preparing data for the wizard and preparing pre-built components for the application logic.

## 🎓 Education

---

2017 – 2021  
Wrocław, Poland

### **Bachelor of Engineering / Faculty of Microsystem Electronics and Photonics / Digital Electronics, University of Science and Technology in Wrocław**

During college, I spent most of my time learning about network, IoT, and microcontroller programming.

## 🧠 Skills

---

Angular

React

Typescript

Javascript

C++

Jenkins

git

Jira

HTML

CSS

## 🌐 Languages

---

• English

• Polish

## 🤝 Organisations

---

06/2020 – 04/2021  
Wrocław

### **CodersCrew, Frontend Developer**

I was a member of CodersCrew - a non-profit organization based in Wrocław. As part of the front-end team I was involved in one of the biggest projects called "Mali Wspaniali". The goal was to create a web application for a foundation helping to fight child obesity. I was responsible for the implementation of views and logic of components based on mockups from Figma. The project was created in React technology.
